We would like to thank everyone for their suggestions and have compiled a list of the top 101 pieces of Survival gear our readers carry with them. Some of these items are great for [Bug Out Bags](#) and wilderness survival, while others might be better suited for an urban survival situation.

Everyone's needs are unique and will change depending on a number of factors. Thanks for checking out the site!

The list is really meant to be a basic list for those just getting started. It is in no way a complete list, or a list of things that need to be included in everyone's stockpile. It is here to give you some ideas, and some things to think about when getting started.

seriously can anyone and I mean anyone explain how a bible is going to save your life in a surviving situation aside from tinder to start a fire cause I am highly doubting you can use it to hunt with or fight off any predatory animals...come on seriously you mean to tell me you have one last spot and your debating something ACTUALLY useful or a bible youll pack the bible....(insert eye roll here)

impressive.... it seems you idiots are on every site and in every blog spreading your faith hate BS. I hope you don't have to find out the hard way but.... whether or not you choose faith, every person has a right to look to God in their time of need. When you are lost, broken and alone, you may wish you had God to speak to yourself. While you clearly do not agree, please exercise your right to be silent while people of greater worth and less arrogance find solitude in their own way. This is still America the last time I checked. As long as people like you dilute the integrity of our foundation, it wont be much longer. Congratulations.... you have reached the top tier of the jackass category.
